Very honored customer

We are pleased about your purchase decision, you have acquired a good Hepco & Becker product!

Beside the well-known advantages of a centre stand (standing of the chassis, ease of service smaller space when parked etc ...), this product is characterized by its stability and by its ease of handling!

Putting the motorcycle up on our stand takes place with little energy expenditure and almost exclusively via the employment of ones own body weight!

When assembling your centre stand, please read and carefully consider the following instructions. **Please check the illustration to understand each part and its location!** We also recommend that when fitting the spring set, one person stabilizes the motorcycle, whilst the other fits.
