

ALU STANDARD - For everyday use and extreme situations

With the Alu Standard collection, we have created models that also stand up to extreme conditions with no trouble at all. The 1.5 mm thick, smooth, highly durable aluminum alloy helped give the collection its name. With their right-angled shape, Alu Standard side cases provide spacious, practical storage space with no protruding corners or edges and are easy to load from above. The foam lid seal keeps the content of the case or top case dry. The different widths side cases can be combined into a set of Enduro. Especially recommended for case carriers that have different mounting widths due to the high exhaust system position typical of Enduros. The Enduro set can eliminate this asymmetry again.

reinforcement

Security kit for expeditions

On extreme expeditions, it makes sense to attach the case to its carrier to deter theft. For this, the security kit is the right option. A special bracket on the exterior hooks behind the luggage carrier.
