

True to our way of thinking, we took a look at our STREET bag and used our experience to create the next generation, which has a simple, timeless design.

The new STREET bag has proven characteristics and offers unbeatable value for the money. The bag's symmetrical shape allows the C-Bow bag to be attached to any side.

The watertight inner bag can simply be removed and taken with you after a rainy ride.

Both bags can also be clamped together to ensure greater system stability with a larger load, while still retaining their shape.

The support base is the C-Bow bag holder from Hepco&Becker. This allows theft-proof attachment of the new-generation Street bags to the motorcycle.

STREET C-Bow Softbag

Item-no. 640600 00 01
